Indigenous GIS Software (IGIS)

(Technology Transferred to M/s Scanpoint Geomatics Limited, Ahmedabad)

Developed with industry participation, IGIS software enables GIS analysis and image processing for Natural Resource Development. IGIS is a seamless Geomatics application with both single user / multiuser platform and includes GIS, Image Processing and its integration with the real time information using GPS. IGIS can cater to various industries in the field of Environment, Healthcare, Forestry, Emergency response, Land information, Transportation, Resource Exploration, Agriculture, Telecommunication, Urban planning and Infrastructure, Security, power & gas utilities.
