## OneWeb India-2 Mission

LVM3-M3 Vehicle Configuration (2S200+L110+C25+5 m PLF)

LVM3 is the heavy lift launcher of ISRO with a successful track record of 5 successive launches so far. The current mission LVM3-M3, is the 2<sup>nd</sup> dedicated commercial satellite mission being undertaken by NewSpace India Limited (NSIL) for its customer M/s. Network Access Associates Ltd (M/s. OneWeb), UK. As part of this commercial arrangement, 36 OneWeb Gen-1 satellites would be launched into 450 km circular low earth orbit (Osculating) with an inclination of 87.4° from Second Launch Pad (SLP) located at Satish Dhawan Space Centre, Sriharikota.

#### **LVM3-M3 Vehicle Characteristics**

Vehicle Height	: 43.5 m
Lift-off Mass	: 643 t
Propulsion Stages	
Strap-on Motors	: 2 x S 200 (Solid)
Core Stage	: L110 (Liquid)
Upper Stage	: C25 (Cryo)

#### LVM3-M3 Stages at a Glance

Strap-ons	Core Stage	Upper Stage
(2 x S200)	(L110)	(C25)
26.22	21.4	13.5
3.2	4.0	4.0
Solid (HTPB)	Liquid (UH25 +	Cryo (LH₂ & LOX)
202.6 (each)	115.9	28.55
	3.2 Solid (HTPB)	$ \begin{array}{cccc} 26.22 & 21.4 \\ 3.2 & 4.0 \\ Solid & Liquid \\ (HTPB) & (UH25 + \\ & N_2O_4) \\ 202.6 & 115.9 \\ \end{array} $

### **LVM3-M3 Mission Specifications** (Osculating)

Semi-Major Axis (km)	: 6828.137
Altitude (km)	: 450 (Circular)
Inclination (deg.)	: 87.4
Launch Pad	: SLP
Launch Azimuth (deg.)	: 138

#### **Payloads**

Payloads	Total Mass (kg)
OneWeb India-2	5805
Satellites (36 Nos.)	

**Payload Mass:** 5805 ka.

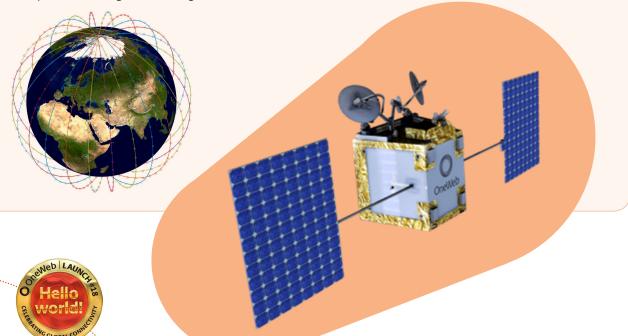

## OneWeb India-2 Mission

## OneWeb Gen-1 Satellites of M/s. Network Access Associates

OneWeb is a global communication network powered from space, enabling connectivity for governments, businesses, and communities. It is implementing a constellation of Low Earth Orbit (LEO) satellites. India's Bharti Enterprises serves as a major investor and shareholder in OneWeb.

This is OneWeb's 18th launch, its third this year, bringing the total of OneWeb's constellation to 618 satellites. This launch is a major milestone for the company, with the number of satellites now in-orbit enabling global service, the first LEO operator to reach this milestone. OneWeb will soon be ready to roll out its global coverage.

## **Post C25 Shut-off Phase Flight Sequence**

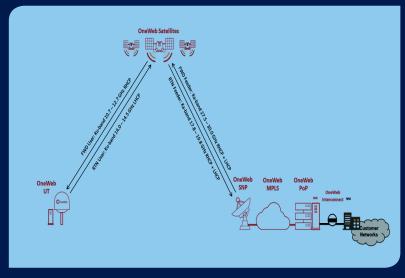

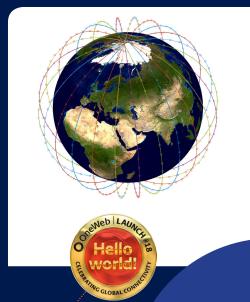

## OneWeb India-2 Mission

## **OneWeb Constellation Design**

- OneWeb Gen-1 is a 150 kg class satellite
- The constellation comprises of 648 individual satellites
- 588 Active Satellites equally divided among 12 planes operate at an altitude of about 1200 km (~745 mi) above the Earth's surface
- Each plane is separated in altitude by 4 km (~2.5 mi) to prevent inter-plane collision
- The payload is a bent-pipe system operating in Ku and Ka band
- The forward link receives Ka-band signals from the gateway via the satellite Ka antenna
- The return link receives Ku-band signals from the User Terminals (UTs) via the satellite Ku antenna
