भारत सरकार के अंतरिक्ष विभाग के अंतगत भारतीय अंतरिक्ष अनुसंधान संगठन (इसरो) का इसरो नोदन कॉम्प्लेक्स (आईपीआरसी) भारतीय प्रमोचन यानों के द्रव नोदन इंजनों और चरणों के समुच्चयन, एकीकरण और परीक्षण के लिए इसरो का प्रमुख कंद्र है।

ISRO Propulsion Complex (IPRC) of Indian Space Research Organisation (ISRO) under Department of Space, Government of India is the lead Centre of ISRO for Assembly, Integration & Testing of liquid propulsion Engines and Stages of Indian Launch Vehicles.

इस अभिरुचि की अभिव्यक्ति (ई.ओ.आई.) का मुख्य उद्देश्य ऐसे ठेकेदार की पहचान करना और उसे योग्य बनाना है जो सेमी-क्रायोजेनिक एकीकृत इंजन म तरल सविसिंग प्रणाली (एफएसएस) की स्थापना और आईपीआरसी म द्रव ऑक्सीजन-मीथेन इंजन और अगली पीढ़ी प्रमोचन यान (एनजीएलवी) के चरणों के परीक्षण के लिए चरण परीक्षण सुविधा (एसआईईटी) की स्थापना कर सके। ऐसे ठेकेदार(रों) जिन्हें तरल प्रणाली/क्रायोजेनिक प्रणाली से जुड़ी पौरयोजनाओं की स्थापना का अनुभव है, वे इस ईओआई की प्रत्युत

This Expression of Interest (EOI) is primarily aimed to identify and qualify Contractor who can take up Establishment of Fluids Servicing System (FSS) at Semi-cryogenic Integrated Engine and stage Test Facility (SIET) for testing of LOX-Methane Engines and Stages of Next Generation Launch Vehicle (NGLV) at IPRC. Contractor(s) who have

experience in establishing projects involving Fluid Systems / Cryogenic Systems shall respond to this EOI.

#### a. ई.ओ.आई. की प्रतिक्रिया/Response to EOI

स्त ( ग्न -1) म दिए गए सभी निदशों,
 ौ, प्र त्र , आवश्यकताओं और अन्य सूचनाओं का ध्यानपूवक अध्ययन कर। ईओआई प्रस्तुत करना ईओआई दस्तावेज़ों के सावधानीपूवक अध्ययन और जांच के बाद किया गया माना जाएगा,

Contractors are advised to study all the instructions; Terms and Conditions; Forms; Requirements and other information in the EOI document (Annexure-1) carefully. The submission of EOI shall be deemed to have been done after a careful study and examination of the EOI documents with full understanding of its implications.

IPRC reserves the right to request for any additional information and also reserves the right to reject the EOI response of any Contractor, if in the opinion of IPRC, the qualification or data is incomplete or if the Contractor is found not qualified to satisfactorily execute the work.

# 1. परिचय/Introduction

ISRO Propulsion Complex (IPRC) of Indian Space Research Organisation (ISRO) under Department of Space, Government of India is the lead Centre of ISRO for Assembly, Integration & Testing of liquid propulsion Engines and Stages of Indian Launch Vehicles. It is located at Mahendragiri in Tirunelveli District of Tamil Nadu, India.

Semi-cryogenic Integrated Engine and Stage Test Facility (SIET) in IPRC is currently equipped with systems for conducting ground testing of Semi-cryogenic Engines and Stages working on Liquid Oxygen and Isrosene (Rocket Propellant grade Kerosene) propellant combination. It is planned to include new Fluids Servicing System to conduct ground testing of rocket engines and stages working on Liquid Oxygen and Liquid Methane propellant combination which will power Next Generation Launch Vehicle (NGLV).

Towards realization of new fluid systems and augmentation of few existing systems at SIET, Department seeks proposal from Bidders and to shortlist potential Bidders, Expression of Interest is invited from interested Contractors.

# 2. प्रणाली विवरण/System Description

प्रणालियों की आवश्यकताओं और मौजूदा प्र निवं की जाने वाली प्रणालियों का संक्षिप्त विवरण यहाँ सूचीबद्ध है। वाणिज्यिक स्थितियों सहित विस्तृत विनिदंश बाद म प्रस्ताव के लिए अनुरोध दस्तावेज़ म प्रस्तुत किए जाएँगे जो पौरयोजना आवश्यकताओं को नियंत्रित

The brief description of systems to be realized are listed here for comprehending requirements of new fluid systems and augmentation of existing fluid systems.

Detailed specifications including commercial conditions will be furnished later in Request for Proposal document which will govern project requirements.

# 2.1. स्थापित की जाने वाली प्रणालियाँ/Systems to be Established:

निम्नलिखित प्रणालियाँ नव स्थापित की जानी ह।

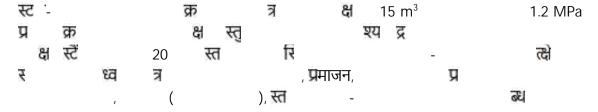

The following systems are to be newly established.

#### 2.1.1. द्रव मीथेन भरण प्रणाली/Liquid Methane Feed System

# a. रन टंकी ए और बी/Run Tanks A & B

Two super insulated cryogenic vessels each of capacity 125 m<sup>3</sup> and Design Pressure 2.0 MPa are planned for storing and feeding Liquid Methane to Test Article. It shall be a vertical vessel installed with ejector for sub-cooling to a Temperature of 95 K. The tank shall have provisions for Pressurization, Purging, Chilling and provided with measurements viz. Pressure, Temperature (fluid and surface), Level and Over-Pressure Relieving Devices.

# b. स्टाट-अप टंकी/Start-up Tank

Start-up is a super insulated cryogenic vessel of capacity 15 m<sup>3</sup> and Design Pressure 1.2 MPa that stores Liquid Methane required for feeding Test Article during start transient. This tank is to be located close at 20 m level of Test Stand Structure. It shall be a vertical vessel installed with ejector for sub-cooling. The tank shall have provisions for Pressurization, Purging, Chilling and provided with measurements viz. Pressure, Temperature (fluid and surface), Level and Over-Pressure Relieving Devices.

#### c. भराव परिपथ/Fill Circuit

```
हा द्य ं ध्य

क्ष स्तु 1 के रूप म उसी 1

1 DN80 2.0 MPa 1

प्र , फ़िल्टर के लिए प्रावधान होंगे और माप जैसे कि , ( ), प्र
```

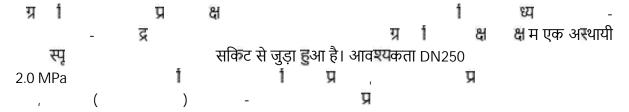

Liquid Methane is sourced to SIET through Mobile Tankers from Storage facility and External Industries. Fill Circuit facilitates transfer of Liquid Methane from Tanker to Run Tanks and Start-up Tank. The same circuit is used as fill and drain circuit for Test Article. Fill Circuit is a super insulated Pipeline of size DN80 and Design Pressure 2.0 MPa. Fill circuit shall have provisions for Purging, Chilling, filter and provided with measurements viz. Pressure, Temperature (fluid and surface), flow and Over-Pressure Relieving Devices.

#### d. भरण पौरपथ/Feed Circuit

```
1 और स्टाट- द्र
1 है जिसम आंतरिक पाइप का आकार DN300, 2.0 MPa 150
1 प्रमाजन, प्र प्र ,
( ), प्र -
```

Feed Circuit supplies Liquid Methane from Run Tanks and Start-up Tank to Engine. It is a super insulated circuit with inner pipe of size DN300, Design Pressure 2.0 MPa and length 150 m. Feed circuit shall have provisions for Purging, Chilling and provided with measurements viz. Pressure, Temperature (fluid and surface), flow and Over-Pressure Relieving Devices.

#### e. संग्रह परिपथ/Collection Circuit

Collection Circuit is used for conducting flow trials. It aids circulation of Liquid Methane from Run Tank-A to Run Tank-B through feed circuit. Collection circuit is connected to Feed Circuit using a temporary pipe spool at test bay. The requirement is a foam insulated circuit of size DN250 and Design Pressure 2.0 MPa. This circuit shall

have provisions for Purging, Chilling and provided with measurements viz. Pressure, Temperature (fluid and surface) and Over-Pressure Relieving Devices.

#### f. फ्लेयर स्टैक/Flare Stack

The Gaseous Methane generated during chill down, venting, discharge from Safety Relief Devices is to be safely disposed and for that an elevated Flare Stack of height 20m is planned. All discharges from Run Tanks and Circuits in Liquid Methane System and Gaseous Methane System are connected to the Flare Stack.

The Vents from Liquid Methane Tanks, Service Circuits and Test Article are connected to a Knock Out Drum (KOD) to collect Liquid Discharge if any and allow only the Gaseous Methane to the flare stack. Knock Out Drum is a Stainless Steel foam insulated vessel of size 30m³ and Design Pressure 0.6 MPa. The flare stack uses two pilot flame torches working on Gaseous Methane with electric igniters and sustains flame throughout the venting process. The flare stack is continuously purged with gaseous Nitrogen to prevent air entry into the stack. The flare stack uses two pilot flame torches working on Gaseous Methane with electric igniters and sustains flame throughout the venting process.

# 2.1.2. द्रव नाइट्रोजन प्रणाली/Liquid Nitrogen System

#### a. द्रव नाइटोजन टंकी/Liquid Nitrogen Tank

```
द्र : 125 m³ क्ष 2.8 MPa
क्र त्र ष्य द्र : ष्य का उपयोग करके गैसीय नाइटीजन म
ां द्र मीथेन टंक म त्क्षे
द्र 1
```

संलग्नक/Annexure-1

A super insulated cryogenic vessel of capacity 125 m³ and Design Pressure 2.8 MPa is required for storing liquid Nitrogen. Liquid Nitrogen is converted into gaseous Nitrogen using vaporizers and supplied for driving Ejectors in Liquid Methane Tanks during sub-cooling operation and supply cold nitrogen for chill down of Liquid Methane feed circuit. It shall be a vertical vessel with provisions for self-pressurization, Purging, Chilling and provided with measurements viz. Pressure, Temperature (surface), Level and Over-Pressure Relieving Devices.

#### b. परिवेशी वाष्पन/Ambient Vaporizers

Gaseous Nitrogen required for running Ejectors in Liquid Methane Tanks and for cool down of Liquid Methane Feed Circuit is obtained by converting Liquid Nitrogen from Storage Tank using Ambient Vaporizers. Two ambient Vaporizers each of each of capacity 12000 Nm<sup>3</sup>/hr is required.

#### c. नाइटोजन मिश्रक/Nitrogen Mixer

Liquid Methane Feed Circuit is pre-cooled with cold Nitrogen before admitting Liquid Methane into the circuit to conserve Liquid Methane and to limit differential thermal stresses. Cold Nitrogen also required as cold fluid for the GCH4 Heat Exchanger supplying cold Gaseous Methane at 145 K  $\pm$  5 K to Test Article.

It is planned to generate cold Nitrogen by direct mixing of Liquid Nitrogen and ambient Temperature Nitrogen in a Mixer. Cold Nitrogen at a flow rate of 2 to 6 kg/s at 120 K  $\pm$  5 K is required at the outlet of mixer. Operating Pressure of Mixer is 0.4 MPa.

#### d. जीसीएच4 ऊष्मा विनिमयक/GCH4 Heat Exchanger

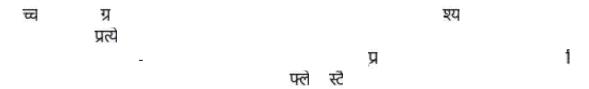

Gaseous Methane (GCH4) at 145 K  $\pm$  5 K | 0.7 MPa | 0.25 kg/s is required for Pressurization of Stage Tank. To meet this requirement, a gas heat exchanger to cool gaseous Methane from ambient Temperature to 145 K  $\pm$  5 K with Cold Nitrogen at a Temperature 120 K  $\pm$  5 K from Mixer is required.

#### 2.1.3. गैसीय मीथेन प्रणाली/Gaseous Methane System

#### a. सिलिंडर/Cylinders

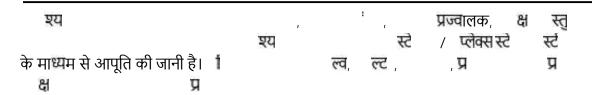

20 Numbers of High-Pressure Cylinders each of capacity 2 m<sup>3</sup> and Operating Pressure 40 MPa are required for storing Gaseous Methane for pressurization of Run Tanks and Test Article Services. The cylinders are assembled in a skid form with isolation valves at the charging and withdrawal ends. Each skid is provided with local pressure measurement and Over-Pressure Relieving Devices. Gaseous Methane cylinders are to be co-located with GN2 Cylinders under the shed.

# b. दाब नियमन प्रणाली/Pressure Regulation System

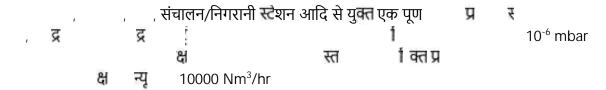

Gaseous Methane stored at high pressure is regulated to the required service pressure using Pressure Regulators. Each Pressure Regulator is planned with a parallel regulator for redundancy. Pressure measurements and Over-Pressure Relieving Devices are planned downstream of regulator. The gaseous Methane vent from circuits is connected to a header and routed to flare stack.

संलग्नक/Annexure-1

Gaseous Methane at required service Pressure is to be supplied for services such as Pressurization of Run Tanks, Mobile Tankers, Pilot igniters, Test Article, etc. through Austenitic / Duplex Stainless steel piping according to Design Pressure requirements. The circuit is to be provided with Isolation Valves, Filters, Pressure Measurements, provisions for purging and Safety Relief Devices.

#### 2.1.4. निवात प्रणाली/Vacuum System

A complete Vacuum System comprising of Vacuum Pumps, piping, measurements, operating/monitoring stations, etc. is to be established for evacuating vacuum segments of super insulated Tanks and circuits in Liquid Methane and Liquid Nitrogen to the extend to 10<sup>-6</sup> mbar. Redundant systems are to be planned in all levels with safety features. The capacity of vacuum pumps shall be minimum 10000 Nm<sup>3</sup>/hr.

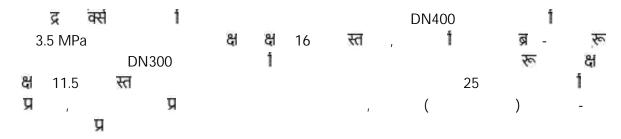

# 2.2. मौजूदा प्रणालियों को संवधित करना/Existing systems to be augmented:

म विद्यमान निम्नलिखित प्रणालियों का संवधि

The following systems existing at facility are to be augmented.

# 2.2.1. द्रव ऑक्सीजन प्रणाली/Liquid Oxygen System

# a. द्रव ऑक्सीजन भरण पौरपथ/LOX Feed Circuit

The existing Liquid Oxygen feed circuit is a super insulated piping with inner pipe of size DN400 and Design Pressure 3.5 MPa. At the 16 m level of test bay, a branch-off

is to be introduced in the existing circuit and extended as super insulated piping with inner pipe of size DN300 to 11.5 m level of Test Bay. Approximate length of piping involved is 25 m. Feed circuit shall have provisions for Purging, Chilling and provided with measurements viz. Pressure, Temperature (fluid and surface) and Over-Pressure Relieving Devices.

#### 2.2.2. गैसीय नाइटोजन और हीलियम प्रणाली/Gaseous Nitrogen and Helium System

Additional circuits for servicing Gaseous Nitrogen and Gaseous Helium are to be realized from Cylinder Storage to Test Bay. These circuits are provided with Pressure Regulators, Isolation Valves, Pressure Measurement and Safety Devices.

# 2.3. क्षेत्र यंत्रीकरण/Field Instrumentation

Field instrumentation comprises of instrumentation related to the field instruments which are to be installed in the test stand. This includes pressure transmitters, temperature transmitters, ultrasonic flow meters, level switches, DP-level transmitters, guided wave radar level transmitters, RTDs, flameproof junction boxes, weatherproof SOV cubicles, cables, impulse / pneumatic tubing, tube fittings, solenoid operated valves, smart valve positioners, cable trays, flameproof CCTVs, flameproof intercoms, earthing systems and MS structural materials. Supply, erection and installation of all field instruments as per the P&ID shall adhere to the accuracy requirements, standards and area classification.

All instrumentation systems will be remotely controlled from a Test Control Centre located 1.8 km away from the test stand and the instrumentation panels will be placed at a panel room 400m away from the test stand.

# 2.4. सुरक्षा एवं अग्नि सुरक्षा प्रणाली/Safety & Fire Protection System

सुरक्षा और अग्नि सुरक्षा प्रणाली म हु- ज्व , , , काबन मोनोऑक्साइड और काबन डाइ-ंक्स प्र प्र ट्रश्य अलाम के माध्यम से स्थानीय घोषणा के साथ एकीकृत किया जाना है ताकि क्षेत्र म किमयों को सचेत किया जा सके। अग्नि सुरक्षा प्रणाली म डेल्यूज प्र , - प्र , , फायर हाइडंट, स्ट- फायर होज़ रील और अग्निशामक शामिल ह। अग्नि जल स्त (जीएलआर) से गुरुत्वाकषण द्वारा पूरा किया जाता है। अग्नि सुरक्षा प्रणाली म टै

Safety & Fire Protection system comprises detection systems namely multi-IR flame detectors, gas detectors for methane, carbon monoxide & carbon di-oxide. The gas detection systems are to be integrated with local annunciation by means of audio and visual alarm to alert the personnel in the field. Fire protection system includes deluge system, foam-water system, remote operated water cum foam monitors, fixed water powered oscillating monitors, fire hydrants, first-aid fire hose reels & fire extinguishers. The fire water is catered from a Ground Level Reservoir (GLR) by gravity fed mode. The fire water would be available in fixed points at SIET for tapping to fire protection system.

The fire protection system circuits involve carbon steel pipes of sizes from DN15 to DN400, flow components namely deluge valves, EP valves, manual valves, filters, water cum foam monitors, fixed water powered oscillating monitors, medium & high velocity water spray nozzles, fire hydrant valves, equipment such as foam skid and structural steel access platforms. The detection & fire protection system includes instruments namely pressure gauge, pressure transmitter, flow switch, joy sticks and necessary electrical, measurement, command cabling & tubing.

# 3. विभाग का विषय-क्षेत्र/Scope of Department

-क्षेत्र म निम्नलिखित शामिल हः

3.8.

प्रक्रियाओं की समीक्षा और अनुमोदन। 3.9. उन्निमाण प्रवतन

Review and approval of procedures for Erection and Commissioning.

3.10. प्रवतन प्रग्र

Programming and validation of the logics for commissioning

3.11. **以**화 द्र 로 क्स ल्क प्रवतन

Process fluids such as Liquid Nitrogen, Liquid Methane, Liquid Oxygen, Gaseous Methane, Gaseous Nitrogen and Gaseous Helium for commissioning at free of cost.

3.12. प्र (ठेकेदार के साथ संयुक्त रूप से)

Commissioning (jointly with Contractor).

# 4. प्रत्यर्थों के काय का विषय-क्षेत्र/Scope of Work of Respondent

The scope of work to be performed by Respondent is listed here for comprehending requirements. Detailed scope of work including technical specifications will be furnished later in Request for Proposal document which will govern project requirements. The scope of work of Respondent shall include:

#### 4.1. प्रक्रिया डिजाइन समीक्षा/Process Design Review:

Upon award of work, Department will provide design document, which gives details such as design calculations for the sizing of the fluid circuits, design of equipment, sizing of flow components and details of instruments. The objective of the design review is to arrive at a consensus between the Department and Contractor on the design of System and to freeze the input data for the detailed engineering to be done by Contractor.

# 4.2. HAZOP अध्ययन/Study:

प्र (LCH4, LN2 GCH4) का डिज़ाइन किसी प्रतिष्ठित तीसरे पक्ष के सलाहकार को क्ष (HAZOP) श्ले HAZOP श्ले सिफारिशों को लागू की जाने वाली प्रणालियों म शामिल किया जाएगा।

Contractor shall submit the design of new systems (LCH4, LN2 & GCH4) to a reputed third party consultant for carrying out Hazards and Operability (HAZOP) analysis. The recommendations of the HAZOP analysis shall be incorporated in the systems realized.

# 4.3. विस्तृत इंजीनियरी/Detailed Engineering:

a. प्रक्रिया डिजाइन समीक्षा और HAZOP अध्ययन म अंतिम रूप दिए गए इनपुट के आधार पर ठेकेदार द्वारा स्तृ प्र स्तृ ौ स्तृ :

Detailed Engineering shall be carried out by Contractor based on inputs finalized in Process Design Review and HAZOP study. Approval of Department shall be taken for all the detailed engineering work done before proceeding with procurement. Detailed Engineering shall include:

#### 4.4. प्रापण और आपूर्ति/Procurement and supply:

v. द्व प्र ौं का बिल प्रस्ताव के लिए अनुरोध दस्तावेज़ के भाग के रूप म व्र प्र स्वौकृति के साथ अपने पूव अनुभव/प्रमाणपत्रों के आधार पर अतिौरक्त विव्र ताओं को भी शामिल कर सकता है। ठेकेदार सभी लागू वैधानिक मंजूरी प्राप्त करने के लिए जिम्मेदार होगा। सभी परीक्षण रिपोट विभाग को प्रस्तुत

Bill of Materials to be procured will be provided by Department as part of Request for Proposal Document with a list of preferred Vendors. Accordingly, Contractor shall procure the items. Contractor may also include additional Vendors based on their prior experience/credentials with the approval of Department. Contractor shall be responsible for obtaining all applicable statutory clearances. All test reports shall be submitted to Department and prior approval shall be taken before Despatch to site.

# 4.5. साइट पर अधिष्ठापन/Installation at site:

Contractor shall carryout installation of items supplied/free issued at site complying with IPRC safety regulations and security protocols. Contractor is responsible for receipt and safe storage of items till commissioning and handover to Department. Contractor shall establish temporary storage/fabrication/office facilities at site. Existing systems at site will be provided by Department to Contractor for modification. Contractor shall be responsible for obtaining all applicable statutory clearances.

# 4.6. निरीक्षण/Inspection:

स्र्वं त्त श्व स्त स्व त्र निरीक्षण के लिए ठेकेदार द्वारा एक प्रतिष्ठित -पक्ष निरीक्षण एजसी को नियुक्त किया जाएगा। निरीक्षणों म त्र GA क्ष , क्ष

A reputed third-party inspection agency shall be engaged by Contractor for independent inspection at all levels as per approved Quality Assurance Plan. The inspections shall include review of GA drawings of pressure vessels, witnessing of fabrication & testing activities at manufacturing shop and site.

#### 4.7. प्रवतन/Commissioning:

Commissioning shall be done jointly by Department and Contractor as per approved procedure. Department will provide all fluids for Commissioning trials.

# 4.8. अनुपालन अनुसूची/Execution Schedule:

The entire work shall be completed in 24 months starting from award of work to commissioning. Any delay in execution beyond the stipulated period shall invoke Liquidated Damages (LD) imposed on the Contractor @ 0.5% of the price of unsupplied materials & unfinished services (delayed portion) per week of delay subject to a maximum of 10 % of the total contract price of delayed portion.

#### 5. नियम और शत/Terms and Conditions

This EOI is neither an agreement nor an offer and is only an invitation by IPRC to the interested parties for submission of EOI. No obligation of whatsoever nature shall arise from the EOI process. IPRC reserves the right, at any time, to waive any of the requirements of this Request for EOI document. After examining the EOI, some or all of the Respondents may be asked to make presentation to IPRC or IPRC officials may visit the Respondent's premises for further evaluation. All correspondence and documents related to EOI shall be written in English.

The validity of pre-qualification shall be up to 12 months from the opening of EOI response.

Mode 2:

A Prime Contractor who possesses financial soundness & previous experience as per clause 6.1 & 6.2, can execute the Contract in consortium with other Co-Contractor who possesses technical capability as per clause 6.3 & 6.4. The Prime contractor shall be responsible and directly accountable to the Department for complete fulfillment of the contractual obligations including those of the Co-Contractor. The Prime contractor shall submit the EOI and fill up the Form 2 including those details on behalf of the Co-Contractor. The Prime contractor and Co-Contractor shall submit a letter of intent signed by all the consortium members stating the names of participating entities and the envisaged responsibilities (viz. Detailed Engineering, Supply of cryogenic vessel, Supply of super insulated piping, Supply of non-cryo piping, Supply of flow components, Installation work at site, Field Instrumentation, etc.) to be undertaken by each member of the consortium. Entities in Consortium shall be limited to a maximum of three. There shall not be any change of Co-contractor permitted during the subsequent phase of bidding and Contract execution, except under force majeure circumstances.

#### 6. पात्रता मापदंड/Eligibility Criteria

7		प्रत्य	द्ध किया जाएगा और बाद म प्रस्ताव के लिए अनुरोध
(	)	प्रक्रे	₹ <u></u>

The responses to EOI will be evaluated based on the following eligibility criteria. Respondents who fulfil all the stipulated eligibility criteria will be shortlisted and screened-in as potential bidders for the subsequent issuance of the Request for Proposal (RFP) and Tender process.

प्रत्यथियों को निर्धारित प्रारूप (बाद के अध्यायों म दिए गए फॉम 1, 2 3) उचित रूप से भरना होगा और उसे दस्तावेजी साक्ष्यों के साथ प्रमाणित करना होगा। बोलीदाताओं को तब तक स्त प्रस्तृ / स्पष्ट त्र स्व

The Respondents shall suitably fill-up all the information solicited in the prescribed Formats (Form 1, 2 and 3 given in subsequent chapters) and shall be substantiated with documentary evidences. There shall not be further opportunity for the Bidders to

submit any information or document unless the Department solicits so at their own discretion. Any lack of information or incomplete/ ambiguous information or false information or information non-compliant with the eligibility criteria shall be treated as a sufficient cause to summarily reject the response to EOI.

#### 6.1. वित्तीय सुदृढ़ता/Financial soundness:

प्रत्यथी म सुदृढ़ वित्तीय टैक रिकॉड होना चाहिए:

The Respondent shall have sound financial track record as given below:

- a. 3 वित्तीय वर्षों के लिए वाषिक कारोबार का साधारण औसत ₹ 65 /Simple average of annual turnover for the last 3 financial years shall be more than ₹ 65 crores; /AND
- b. 3 ै 2 वर्षों के लिए कर के बाद सकारात्मक /Positive Net Profit after Tax for at least 2 years out of the last 3 years

#### 6.1.1. प्रस्तुत किए जाने वाले प्रत्यय-पत्र/Credentials to be submitted:

3 त्तं ौ 2021-2022, 2022-2023 2023-2024 के लिए लेखा परीक्षक द्वारा प्रमाणित त्र

Auditor certified balance sheet statements for the last 3 years Financial Years viz. 2021-2022, 2022-2023 & 2023-2024.

# 6.2. पूव अनुभव/Previous Experience:

प्रत्य । 10 वर्षों म (अथात 01.12.2014 /स्वं ) ल्य पौरयोजनाओं को सफलतापूवक पूरा किया होगा, त्र, , प्र , त्रं प्र प्र प्र स

The Respondent shall have successfully completed projects of total value given below in the last 10 years (i.e. completion/acceptance date after 01.12.2014) which shall include supply & installation of Process Fluid Systems such as Pressure Vessels, Piping, Flow Components, Instrumentation, etc.:

a. ₹ 135 करोड़ या उससे अधिक मूल्प का एक काय/One work of value equal to or more than ₹ 135 crores

/OR

b. दो काय जिनम प्रत्येक काय का मूल्प ₹ 90 /Two works of value of each work equal to or more than ₹ 90 crores

/OR

- c. तीन काय जिनम प्रत्येक काय का मूल्य ₹ 65 /Three works of value of each work equal to or more than ₹ 65 crores
- d. मूल्यांकन हेतु वतमान मूल्य पर पहुंचने के लिए क्र ल्य 7% प्रति वष (साधारण ब्याज) की दर से Æscalation @ 7% per year (simple interest) on the PO value will be considered for assessment to arrive at present value for evaluation.

# 6.2.1. प्रस्तुत किए जाने वाले प्रत्यय-पत्र/Credentials to be submitted:

a. 頭 /Copy of Purchase Order

/AND

- b. ग्राहक द्वारा जारी किया गया स्वीकृति प्रमाणपत्र या तृतीय पक्ष निरीक्षण एजसी द्वारा जारी निरीक्षण /Corresponding acceptance certificate issued by the client or Inspection Release Note by Third Party Inspection Agency.
- 6.3. क्रायोजेनिक पात्रों की आपूर्ति की तकनीकी क्षमता

#### **Technical capability to supply Cryogenic Vessels:**

प्रत्य 1/ - 10 वर्षों म (अथात 01.12.2014 के बाद की पूणता/स्वीकृति तिथि) 100 m³ **क्ष** 0.3 MPa(a) द्वे ते क्र त्र की आपूति सफलतापूवक पूरी कर ली होगी।

The Respondent/Co-Contractor in Consortium shall have successfully completed supply of Double Walled vacuum insulated Cryogenic Vessel of capacity equal to or greater than 100 m<sup>3</sup> and Design Pressure equal to or greater than 0.3 MPa (a) in the last 10 years (i.e. completion/acceptance date after 01.12.2014).

#### 6.3.1. प्रस्तुत किए जाने वाले प्रत्यय-पत्र/Credentials to be submitted:
